Student Sponsorship with the Happold Trust for studies in the built environment

Buro Happold is a multi-disciplinary engineering consultancy formed in 1976. It provides a broad portfolio of consulting engineering services and has contributed to some of the world's most prestigious buildings, including:

- Arsenal FC's Emirates Stadium, London, UK
- The Eden Project, Phase IV, St Austell, Cornwall, UK
- The O2, London, UK (former site of the Millennium dome)
- The Memorial for the Murdered Jews of Europe, Berlin, Germany
- The Savill Building, Savill Garden, Windsor, UK

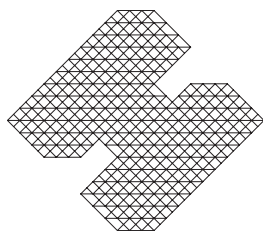

The Happold Trust is a registered charity promoting education, research and training in the construction industry, engineering design and technology. The Trust was set up in 1995 by the founding partners of Buro Happold but operates independently of the practice.

Each year the Trust sponsors a number of final year engineering students from a range of engineering disciplines and other areas related to building and construction.

The sponsorship is for £2,100 and provides the opportunity to spend eight weeks during the summer in one of Buro Happold's UK or overseas offices. As well as being reimbursed for your time, you will experience working life within one of the industry's most creative and dynamic engineering consultancies.

To apply for sponsorship, please post or e-mail your CV and a brief explanation of why you would like to be given this opportunity to:
