

**Informal Study Group**  
on  
**Model analysis as a design tool**

# **2001 Prize Award**

# **£200**

will be awarded for the best paper dealing with  
the use of physical models and testing techniques in  
structural engineering design.

The paper, not exceeding 25 pages, should describe a physical modelling project concerned with the resolution of a practical problem related to any form of construction, including marine and coastal structures and using any construction material, including steel, concrete, masonry, timber and composites.

The competition is open to third & fourth year undergraduates  
and first year postgraduates.

The closing date for entries is 25 June 2001.
